**The Benefits of Going to a Prosthodontist**

Do you often feel self-conscious about your smile? Do you have to cover your mouth when you talk? A healthy smile is among the top aspects of a person's appearance that impacts self-esteem. If you are unhappy about the "look" of your smile, you should consult a Prosthodontist.

But what is a Prosthodontist? They are experts in the restoration and replacement of teeth; they make smiles look beautiful and function the way they should. Having this advanced training, Dr. Stuart Rimes can improve your appearance by fixing broken, discolored or missing teeth, many times in just one appointment. Dr. Rimes' training also gives patients the opportunity to switch from dentures to permanent implant supported teeth in just one day. Did you know that some dentists perform reconstructive dental work after just a weekend course on a procedure? You should know Prosthodontists receive an extra three years of intense, formal training at an accredited institution beyond dental school.

People seeking cosmetic, reconstructive or implant retained dental work should do research before making a decision in order to ensure proper care. As ADA recognized specialists, Prosthodontists are qualified to offer service in state-of-the-art procedures and techniques, such as cosmetic dentistry, dental implants, teeth-in-a-day restorations, complete and removable partial dentures, snoring and sleep disorders.

By using his extensive training in cosmetic dentistry, along with the latest techniques in dental implants, Dr. Rimes can help you create a smile that looks and feels natural and attractive. Visit [www.rimesdds.com](http://www.rimesdds.com) or call Dr. Stuart Rimes at 281-313-1565. **f**
